

Winter Hill - Cupressus Summary

www.winterhill.com.au

Botanical Name	Cupressus Cashmeriana	Cupressocyparis Lleylandii Leightons Green	Cupressus Torulosa Arctic Green	Cupressus Macrocarpa 'Aurea Saligna'	Cupressus Sempevirens Glauca	Cupressus Nitchkes Needle
Common Name	Kashmir Cypress	Cypress Leighton Green	Bhutan Cypress	Conybear	Pencil Pine Cypress	Italian Pencil Pine Cypress
General Info	Graceful tree with softly weeping foliage. The seed cones dark green to dark brown in colour, 1-2cm long and egg shaped. The pollen cones are 3-5 mm long, and release pollen in early spring.	Fastest growing conifer most often used for hedging/ screening. Can be trimmed and shaped but will require regular pruning maintenance in restricted areas. Dense, uniform conical habit. Produces round, brown female cones and egg-shaped yellow male (pollen) cones.	Dense foliage. Base of tree may become bulbous with age sometimes referred to as 'witches hat' because of shape. Low maintenance and little pruning required. The cones are light tan, nearly spherical, about 4 cm in diameter.	Very broad tree. Thread-like foliage is aromatic (lemon scented) and 'hangs' from branches. The (female) seed cones are round to oval in shape 2-4cm long, green at first, maturing brown. The (male) pollen cones are 3-5 mm long, and release their pollen in late winter or early spring.	Stiff, dense compact tree. Very strong columnar appearance. Produces very few cones and usually only in cool climates so retains form well as branches are not weighed down. Also does not produce pollen.	Compact tree with stiff upright dense foliage. Bulbous cones 2-3cm in length form in clusters.
Growth Speed	Moderate: 45cm per year to reach 5m in first 10 years	Fastest	Moderate: 60cm per year	Slow	Moderate	Slow to moderate; 6m in first 10 years

Botanical Name	Cupressus Sempevirens Swanes Golden	Cupressocyparis Lleylandii Castwellan Gold	Cupressocyparis Lleylandii Naylor's Blue	Cupressus Glabra Blue Ice
Common Name	Swanes Golden Pencil Pine Cypress	Cypress Leylandii Gold	Cypress Leylandii Blue	Blue Ice Cypress
General Info	Australian cultivar of the Italian Pencil Pine. Tall, narrow golden columns. The trees produce hard, brown, half-inch cones in cold climates.	Hardy but needs sun to maintain golden colour. Produces small round, brown female cones and egg-shaped yellow male cones.	Foliage appears to weep at tips. Can be clipped to a formal hedge. Does not produce many cones.	Upright habit. Aromatic foliage. Colour and form make it a great specimen tree to add contrast to a garden. Cones are rounded, 1-2cm diameter and form in clusters.
